

SHAPING THE FUTURE TOGETHER

- Cath Pritchard shares her story

THE BACKGROUND

Cath began at Magnox in 2006 following a career working for a local newspaper and at Bangor University mentoring foreign and English students. Spells in Human Resources and Learning & Development helped shape Cath's thinking about her future.

So when Shaping the Future was announced, Cath realised that the project would help her to begin preparing for her new chosen career.

THE APPROACH

"Shaping the Future was ideal for me as I was already thinking about my future – what it did was give me the tools and advice to help me to do this" Cath says.

Cath submitted her Career Journal in 2012 with the aim of taking positive steps towards her goal: the start of a career in Corporate Event Management.

Having attended the Launch Event and discussed the Strengthscope Report with her Coach, Cath became clearer on her strengths – as well as her areas for development. This allowed her to identify the right course. With her application for study funding approved, she is currently working with Shaping the Future to find a Corporate Events Manager Diploma course and a suitable provider.

In addition to the advice she received, Cath also appreciates that the financial support has been extremely helpful in enabling her to realise her vision and goals.

THE FUTURE

"I hope to begin my Diploma course later on this year" Cath confirms. *"I think Shaping the Future has been fantastic for me personally as it gave me the tools to help plan what I wanted to do."*

Cath is positive about a change in direction albeit is still a people-centred career – and that is very much her forte.

"Shaping the Future is, quite simply, helping me to shape my future."
